

da Vinci Color

The New Era of 3D Printing

16 Million Color Possibilities

The da Vinci Color uses 3DColorJet technology, which combines inkjet printing with fused filament fabrication (FFF) 3D printing to create full color prints. This combination allows the CMYK inkjet technology to drop color onto every layer of PLA filament, making the da Vinci Color able to cover the full spectrum of color.

Ready to print in FULL COLOR Auto Calibration

The printer will include a starter Color PLA filament and a set of starter ink. There is no need to manually input settings, as it can print right out of the box with preset parameters. The resolution of the da Vinci Color is 100-400 microns and the max print speed is 140mm/sec.

With Hands-Free, auto-calibration system, the motor will move itself for you to make sure the distance between the extruder and the print bed is perfect. To ensure accurate prints, all you need to worry about is the 3D model file itself.

Removable Print Bed

The da Vinci Color comes with a magnetic removable print bed, which can easily remove the prints without prying. This lets users create perfect full color prototypes, models and figurines, or even help them create their own full color printing business.

What else do we offer

Wi-Fi Connectivity

The da Vinci Color allows anyone to wirelessly send 3D files from their computers to their 3D printer, from anywhere in their local area network. No lines, no cable management, no worries.

User-friendly UI

The da Vinci Color is equipped with a 5 inch LED touch screen, which lets you navigate all the functions easily. Plus, all XYZprinting printers come with FREE CAD and slicing software. The user-friendly UI design will lead you all the way from modeling to printing.

Colorful 3D Models

We gathered passionate and creative designers, sharing 3000+ 3D models available for free download. Besides, we also have lots of full-color models available. Join the community and create together!

Tech support

Besides online tickets, you can also reach our tech support via Skype or telephone. Visit our website to learn more.
